

Secure File Upload Utility Guide

In an effort to provide a user friendly secure means of transmitting electronic data to National Research Corporation we have created a secure web based file upload utility. The site uses SSL with 128 bit strong encryption to secure data during transport. The utility is as easy to use as sending an email and creates a receipt of the transaction that is mailed back to you for your records.

The site can be accessed by entering the URL below into any Internet Explorer Web Browser version 5.5 or later or by clicking the link below.

<https://www.nrcpicker.ca/dataexchange/>

Once you arrive at the site you will be asked for your user name and password. Enter the username listed below and use your email address for your password as depicted below.

username: anonymous

password <your email address goes here>

A screenshot of the login page for the NRC+PICKER CANADA secure file upload utility. The page has a teal header bar with navigation links: "About Us", "Products & Services", "My Solutions", and "Contact Us". Below the header is a large white rectangular area. In the center of this area is a smaller, light blue rectangular box. Inside this box, the text "To sign in, enter your user name and password." is displayed. Below this text are two input fields: "User Name:" with the value "anonymous" and "Password:" with a masked password represented by asterisks. A "Sign In" button is located at the bottom right of the input fields.

NRC+PICKER CANADA

If you have successfully logged into the site you should see the page below. Please enter your first name, last name, facility name, study ID (if you know it), a description of the file (i.e. IP encounters), the beginning and ending service date range of the file, and file type. The next step is to actually select the file. This is accomplished by clicking the “browse” button, navigating to the location on your local computer or network folder where the file is stored and selecting the file. Once this is accomplished click the “upload my file” button in the lower left hand corner of the screen.

Current User:

Welcome to the NRC+Picker DataExchange site. Please refer to the [Data Upload Instruction Manual](#) if you need help using this site. NRC+Picker's [privacy and security statement](#) guarantees that your data files will be transmitted safely.

Please provide your name, a description of the file (including service date range) and the type of file being uploaded. When you are ready to transmit the file click on the **browse** button and select the file you wish to upload. To transmit the file click the **upload** button.

Please remember to compress your files before uploading.

First Name:	<input type="text" value="John"/>
Last Name:	<input type="text" value="Smith"/>
Facility Name:	<input type="text" value="Alpha Hospital"/>
Study ID:	<input type="text" value="12345"/>
File Description:	<input type="text" value="IP Encounters"/>
Beginning Service Date: <small>(as "mm/dd/yyyy")</small>	<input type="text" value="01/01/2005"/>
Ending Service Date: <small>(as "mm/dd/yyyy")</small>	<input type="text" value="03/01/2005"/>
File Type:	<input type="text" value="Text (tab delimited)"/> 
File to upload:	<input type="text" value="C:\Documents and Settings\Desktop\Q105 IP Data"/> <input type="button" value="Browse..."/>

Note: Large files may take a few minutes to upload.

NRC+PICKER CANADA

Once you begin the upload process, you should see a dialog box pop up with a task bar indicating the estimated time of upload. If you have a small file you may not actually see this pop up. After your file has been uploaded you will receive a thank you page that asks you if you would like to load another file.

Exit the site once you are complete. A confirmation email will be sent shortly after you upload the file confirming receipt.
